518	2020 case study – risk & uncertainty
573	2021 practice papers x 3 – the UK economy
644	2021 case study – the UK economy

## Preface

This single, fully searchable pdf of 700-plus pages, 300 charts, diagrams and tables - and a quarter of a million words - contains all the works Anketell Training have published for Edexcel's 'Economics B' specification since it was introduced for first examination in 2017, up until March 2021.

It incorporates the five full Case Studies plus 21 sample papers complete with mark schemes and suggested answers. The aim is for teachers to keep this on their intranet as a quick way of searching for lesson materials on any particular topic. In the macro-economic field this includes the study of both globalisation and the UK economy in 2021. Within microeconomics it covers market failure & government intervention, the labour market and risk & uncertainty.
